

|                                  |  |
|----------------------------------|--|
| <a href="#">ArrayExpress</a>     | High-throughput functional genomics data (RNA-seq, ChIP-seq, and other types of gene expression and epigenomics datasets).<br>(Also a good alternative: <a href="#">GEO</a> at NCBI).  |
| <a href="#">ENA</a>              | Nucleotide sequencing information: raw sequencing data, sequence assembly information and functional annotation.<br>(Alternatively: <a href="#">GenBank</a> , <a href="#">SRA</a> - Sequence Read Archive, <a href="#">TSA</a> - Transcriptome Shotgun Assembly, all at NCBI). |
| <a href="#">EVA</a>              | Genetic variation data from all species.   |
| <a href="#">IntAct</a>           | Molecular interaction data.  |
| <a href="#">LIPID MAPS</a>       | Information on Lipids and their structures, properties and functions in biological processes.  |
| <a href="#">MetaboLights</a>     | Metabolite structures and their reference spectra as well as their biological roles, locations and concentrations, and experimental data from metabolic experiments.   |
| <a href="#">BioModels</a>        | Computational models of biological processes.  |
| <a href="#">ModelArchive</a>     | Theoretical models of macromolecular structures.   |
| <a href="#">PDBe</a>             | Experimentally obtained structures of biological macromolecules.   |
| <a href="#">PRIDE</a>            | Mass spectrometry-based proteomics data.   |
| <a href="#">UniProt</a>          | Protein sequence and function data.  |
| <a href="#">BioImage Archive</a> | All biological image data, including light microscopy, 2D-electron microscopy.   |
| <a href="#">EMPIAR</a>           | Raw cryo-EM data and other 3D-electron microscopy images.  |
| <a href="#">EMDB</a>             | Processed cryo-EM data and other 3D- electron microscopy images.   |
| <a href="#">ecbd</a>             | European Chemical Biology Database, run by EU-OPENSREEN, collects experimental results from biological screening programs. Deposit option possible for EU-OPENSREEN partner sites.   |

|                                       |  |
|---------------------------------------|--|
| <a href="#">BioStudies</a>            | All data from Life Sciences research that do not fit in specialized archives. Part of the ecosystem of data resources hosted and managed by EMBL-EBI, it is integrated with many of the specialized resources listed above as well as with the literature repository Europe PMC (PubMedCentral). |
| <a href="#">Pangaea</a>               | All data from Earth and Environmental Sciences research. PANGAEA is hosted by the Helmholtz Center for Polar and Marine Research and the University of Bremen.   |
| <a href="#">Polish Polar Database</a> | All data related to polar studies collected by researchers from Poland.  |

|                        |  |
|------------------------|--|
| <a href="#">RepOD</a>  | All research-related data. This is a general repository managed and hosted by ICM University of Warsaw, for all researchers in Poland. |
| <a href="#">Zenodo</a> | All research-related data. EC-funded repository run at CERN in Geneva for researchers from all countries.                              |
