## 3. DESCRIPTION OF ACTIVITIES

## Implementation of Research Tasks and Milestones

*(Refer directly to the tasks listed in Appendix no. 1 of your Grant Agreement. Describe the activities performed, the role of each partner laboratory, and whether the planned milestones were achieved.)* [Type text here]

## Main Scientific Results and Outputs

*(Describe the concrete results obtained during the minigrant, including data generated, methods established, or plant materials developed.)* [Type text here]

## Collaborative Synergy & Tangible Deliverables (NAWA KPI)

*(Tick the appropriate boxes and provide specific details/titles/names below) \**

- Joint publication in preparation / submitted: *(Provide tentative title, target journal, and list of co-authors from both institutions)*
- Joint grant proposal planned / developed: *(Provide target funding agency, call name, project acronym, and partners involved)*
- Two-way knowledge/technology transfer: *(Describe the specific methodology or advanced technical expertise introduced to IBB or the Home Institution)*
- Increase in researcher's competence: *(Describe unique training received on specialized research infrastructure)*
- *Other:*

[Provide detailed descriptions for the selected points here]

## Sustainability of the Strategic Cooperation (Next Steps):

Detail the concrete steps planned to maintain and expand the cooperation between the two research groups after the minigrant ends (e.g., co-supervision of PhD students, follow-up bilateral visits, planned guest lectures, joint organization of workshops, or sharing of specialized plant materials/genetic resources).

### Human Capital & Early-Career Researcher Development:

How has this exchange enhanced the international research competences, soft skills, or career prospects of the young researcher/PhD student involved? Mention any unique training received on specialized research infrastructure that is unavailable at the Home Institution.
